Management node REST API UI overview 1

Management node REST API UI overview

By using the built-in REST API UI (`https://<managementNodeIP>/mnode`), you can run or understand APIs relating to the management node services, including proxy server configuration, service level updates, or asset management.

Tasks you can perform with REST APIs:

Authorization

- Get authorization to use REST APIs

Asset configuration

- Enable Active IQ and NetApp HCI monitoring
- Configure a proxy server for the management node
- Configure NetApp Hybrid Cloud Control for multiple vCenters
- Add compute and controller assets to the management node
- Create and manage storage cluster assets

Asset management

- View or edit existing controller assets
- Create and manage storage cluster assets
- Remove an asset from the management node
- Use the REST API to collect NetApp HCI logs
- Verify management node OS and services versions
- Getting logs from management services

Find more information

- Access the management node
- NetApp Element Plug-in for vCenter Server
- NetApp HCI Resources Page
