Remove an asset from the management node 1

Remove an asset from the management node

If you physically replace a compute node or need to remove it from the NetApp HCI cluster, you must remove the compute node asset using the management node APIs.

What you'll need

- Your storage cluster is running NetApp Element software 11.3 or later.
- You have deployed a management node running version 11.3 or later.

Steps

1. Enter the management node IP address followed by `/mnode/1/`:

```
https://<managementNodeIP>/mnode/1/
```

2. Click **Authorize** or any lock icon and enter cluster admin credentials for permissions to use APIs.
 - a. Enter the cluster user name and password.
 - b. Select **Request body** from the type drop-down list if the value is not already selected.
 - c. Enter the client ID as `mnode-client` if the value is not already populated.
 - d. Do not enter a value for the client secret.
 - e. Click **Authorize** to begin a session.
 - f. Close the window.
3. Close the **Available authorizations** dialog box.
4. Click **GET/assets**.
5. Click **Try it out**.
6. Click **Execute**.
7. Scroll down in the response body to the **Compute** section, and copy the `parent` and `id` values for the failed compute node.
8. Click **DELETE/assets/{asset_id}/compute-nodes/{compute_id}**.
9. Click **Try it out**.
10. Enter the `parent` and `id` values you copied in a previous step.
11. Click **Execute**.
